ADMISSION TEST: CONTENTS - EVALUATION CRITERIA - DURATION.

1. The admission test is the same for all applicants and will be arranged by the CINECA on behalf of the University. The admission test consists in answering **60 (sixty) questions** in English with five response options, of which the candidate must identify only one, discarding the wrong conclusions, arbitrary

or less probable, on the following topics: general culture (No. 2 questions), logical reasoning (No. 20 questions), biology (18 questions), chemistry (12 questions), physics and mathematics (8 questions), on the basis of the program set out in Annex "A" of the Ministerial Decree of April 26th 2018 n. 337.

2. A maximum of **90 (ninety)** points are attributed for the evaluation of the admission test and the following evaluation criteria apply:

- a) 1.5 points for each correct answer;
- b) minus 0.4 (-0.4) points for each incorrect answer;
- c) 0 points for each question left blank/unanswered.

In case of equal score, the following criteria will apply:

- In descending order, the score obtained by candidates in, respectively, answering the questions related to the topics of logical reasoning, general culture, biology, chemistry, physics and mathematics.
- In case of further equal score, the younger candidate prevails.

The duration of the exam is set for one hundred (100) minutes.

The admission test will take place even if the number of applications is equal to or less than the number of places available.

ADMISSION TEST: CONDITIONS OF EXECUTION - OBLIGATIONS OF CANDIDATES - SUPERVISION.

1. At the time of the test, each candidate is given a package prepared by CINECA on behalf of the University.

Each package contains:

- a) a personal data card without identification code;
- b) the questions related to the admission test bearing the identification code of the envelope;
- c) an answer form, with the same identification code as the envelope;
- d) a sheet with the same identification code of the envelope and the indication of the University and of the degree course for which the test is taken;

Should it become necessary to replace even only one of the documents indicated in points b) and c), the entire envelope will be replaced as they are identified by the same code.

Any corrections or signs made by the candidate on the personal data card do not imply its replacement. The replacement is provided only if the signs or corrections involve an objective difficulty in identifying the candidate: in that case, the Board will replace the personal data card by taking one of the reserve parcels and the operation will be acknowledged in the classroom minutes. In any case, the replacement of the personal data card never implies the replacement of the entire package.

Before the beginning of the test, the President of the Board of Exam draws 4 (four) students among the candidates and verifies with them the integrity of the boxes, opens them and starts distributing the envelope among candidates, and gives each candidate the "**instruction sheet to fill in the answer form**". The instruction sheets are distributed before the beginning of the test.

For the completion of the answer form, candidates must only use an indelible black pen, provided by this University and must mark the chosen answer by placing an **X** in the corresponding box. Only once may candidates correct the answer already given, taking care to completely blacken the previously traced box and choosing another one: in any case, only one of the five boxes must be marked with an **X**, otherwise no answer is considered to be given.

The answer form provides, in correspondence with the progressive number of each question, a small circular figure that the student must check only if he intends to give certainty that he/she will not answer. This indication, once affixed, can no longer be changed; if the candidate does not put any sign in the answer boxes, even if he does not bar the circular figure, the answer is considered not given.

On the answer form - for the purpose of determining the relative score - there must be no sign or any identification mark, otherwise the test will be considered invalid.

At the end of the test, the candidate goes to the dedicated station, placed at a reasonable distance from the Board, and is invited to choose a pair of identical adhesive labels. Each identical label must be applied on the answer form and on the personal data sheet of the candidate. Therefore, the candidate must undersign the declaration of truthfulness of the personal data and correspondence of the codes of the labels applied to the duly completed data sheet and the answer form. At the end of these operations, the candidate must insert the personal data card in the sealed container present in the dedicated station and go to the Board's location where he inserts the answer form into the closed container prepared therein.

In addition to the answer form and the personal data sheet, the candidate must also turn in the sheets containing the questions related to the test and the control sheet of the envelope to the Commission.

2. During the test, it is forbidden for candidates to keep, bags, backpacks, books or notes, mobile phones and other electronic devices, including "smartwatches", able to connect via "wireless" connections, or to the normal telephone network with UMTS, GPRS, GSM protocols, under penalty of cancellation of the test. Therefore, candidates who possess such equipment will have to turn them in to the identification staff before entering the room or in the area where the candidate was assigned to perform the test.

During the test, candidates are not allowed to communicate with each other verbally or in writing, or to relate with others, except with the members of the Board or the Supervisory Committee or with the technical-administrative staff responsible for supervision.

The candidate who contravenes the provisions of this article is excluded from the competition.

Candidates are eligible only if they have scored more than zero (0) points; Candidates who have not provided any answer to any question are not included in the ranking.
